

## 2017 State Profile — United States and Other Jurisdictions National Survey of Substance Abuse Treatment Services (N-SSATS)

The National Survey of Substance Abuse Treatment Services (N-SSATS) is an annual survey of facilities providing substance abuse treatment. It is conducted by the Substance Abuse and Mental Health Services Administration (SAMHSA). The N-SSATS collects data on the location, characteristics, services offered, and number of clients in treatment at alcohol and drug abuse treatment facilities (public and private) throughout the 50 states, the District of Columbia, U.S. territories, and other jurisdictions.

More information on the methodology used is available in the 2017 N-SSATS report:

<https://www.samhsa.gov/data/all-reports>

The 2017 N-SSATS included 13,585 substance abuse treatment facilities, which reported a total of 1,356,015 clients in substance abuse treatment on March 31, 2017. The survey response rate was 89.2 percent overall.
