

**2019 National Survey of Substance Abuse
Treatment Services (N-SSATS)
Client Counts Worksheet**

Important Instructions for 2019 N-SSATS

Located on the back of this instructions page is a worksheet consisting of **questions 31 through 36** from the 2019 N-SSATS. These questions contain several important components of information that will be collected during your completion of the client counts section of the survey. To **preview** the client counts section for wording and specifics of who to count, please visit <https://info.nssats.com> and click on the questionnaire.

In addition to the client counts that have been collected in previous years (inpatient, residential, outpatient, methadone, buprenorphine, and naltrexone), this year we are also asking for numbers of clients receiving specific medications for alcohol use disorder.

To save time, and to complete the survey more efficiently on the Internet, you may wish to gather this information prior to beginning the survey. If you do collect this information ahead of time, **please be sure to keep this sheet accessible** for when you complete the questionnaire online. Although this is not a necessary step to completing the questionnaire, it may ease your survey completion process. Please keep the following points in mind when completing this worksheet.

- **Questions 31 through 36** on the N-SSATS ask about the number of clients in treatment on or as of **March 29, 2019**. If possible, report clients for this facility only.
- If you have multiple facilities in your network/organization, please write your **“Facility/Group name”** in the space provided at the top of the worksheet on the back of these instructions to keep track of each of your facility’s client counts. It might be helpful to make a copy of the worksheet for each facility/group.
- You may use **estimated information** to indicate your client counts, if necessary.
- Please refer to the **enclosed pink flyer** in your survey packet to obtain your facility’s web survey login information.
- Please **transfer all of the information** from your client counts worksheet into the client counts section of the web survey.
